RESIDENT
109 PINE VALLEY DR.
WILMINGTON, NC 28412

Dear RESIDENT,

On Thursday, September 15, 2005 a portion of a 24-inch waste water pipe main line ruptured at 3810 Shipyard Boulevard. The line pumps waste water to the Southside Waste Water Treatment Plant. There is no threat to drinking water and waste water services have not been interrupted. However, as a precaution, the city recommends that you not come into contact with the water.

City crews are onsite stabilizing the affected area and making repairs. Due to the location of the spill near your property please be advised that City crews working to repair and clean up the spill may come on to your property. We anticipate that clean up will be completed within the next 3-4 days.

If you would like more information, you may call (910) 341-1010 Ext. 2222 or e-mail shipyard@wilmingtonnc.gov

Thank you for your cooperation.

Sincerely,

Sterling B. Cheatham
City Manager
